

DERMOSCENT BIO BALM®

REPAIRING AND PROTECTIVE BALM

200 ml

Repairing, emollient and hydrating ingredient:

- Soybean oil from responsible farming*

Soothing and purifying ingredient:

- Cajeput essential oil

Directions for use:

Apply a thin layer on clean and dry skin. Do not cover or bandage.

Use regularly to maintain an optimal hydration and protection:

- once to twice a day on dry or thickened areas
- once to twice a week on friction-prone areas weakened by muddy conditions

Occlusive properties

- ✓ Ideal protective barrier for humid and muddy environments

Organic-certified ingredients
Water-resistant texture

It is particularly recommended to apply **Dermoscent BIO BALM®** for horses during periods of intensive training (races, etc.), before and after each exercise on areas prone to friction.

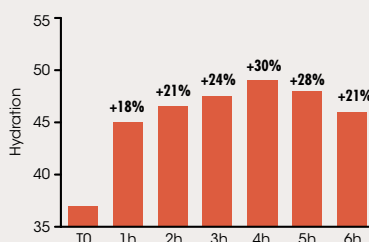

For an optimal use, it is recommended to store the jar at a temperature between 5°C and 25°C.

Open study

Protocol

- **6 subjects**
- Evaluation of skin hydration with a corneometer after application (T0) of **Dermoscent BIO BALM®** for horses

Results

Case of skin irritation
related to a humid
environment
