

All in favor of
immediate
vascular
access say
EZ-IO®!

Ready for pets.
Proven on people.

From the Experts:

"When you absolutely, positively must have access, the EZ-IO® is quick, easy and foolproof."

James J. Elliott, DVM, DACLAM, DACVPM, Director Laboratory Animal Resources, UT Health Science Center

"The EZ-IO® is a critical tool that every veterinarian should carry."

Vicky Hanes, DVM, Texas A&M University

Ready for pets. Proven on people.

Advantages of EZ-IO®

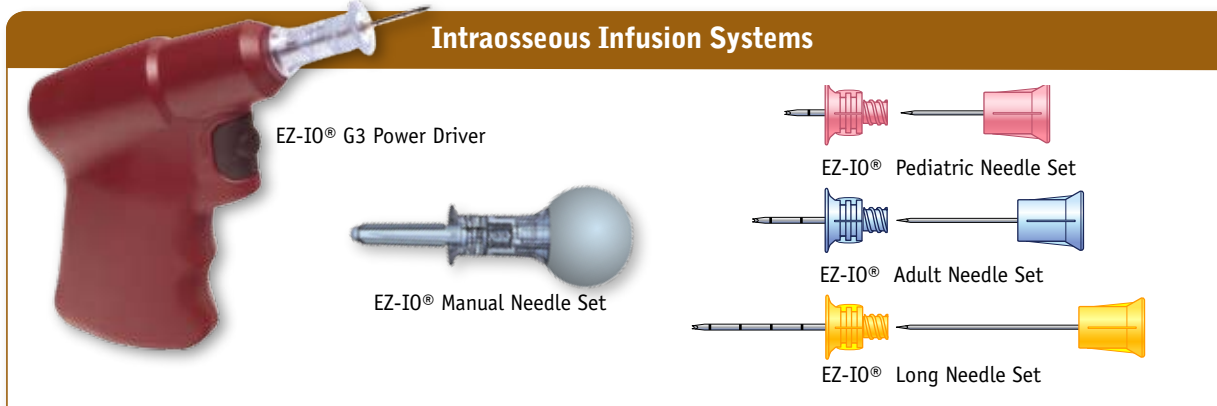

- Ease of use in both large and small animals
- Establishes vascular access in less than 10 seconds
- Drug delivery equivalent to an intravenous line
- Successfully used with dogs, goats, pigs, rabbits, gorillas, birds, horses, lions and sea turtles
- Humane alternative – relatively painless insertion equivalent to a peripheral IV in humans
- Extremely low complication rate
- Delivers any drug and fluid
- Validated and approved by leading research institutions worldwide
- Currently used for humans by 75% of ambulances and 50% of hospitals nationwide
- Adopted in over 50 countries worldwide
- Proven in 200,000 humans
- Powered Driver shelf life – over 1,000 uses
- Needle set shelf life is 4 years

Situations for EZ-IO® Use

- Major medical or traumatic events
- Animals requiring immediate medications for airway management or sedation
- Animals with difficult or time consuming peripheral venous access
- Provides “bridge” allowing immediate stabilization and controlled treatment
- Intraosseous route has over 75 years of proven success in animals
